Speed
GOOD (10Mb)

Internet Access
BASIC

Security
NONE

What does this all mean?

Speed: This is how fast content and data is transferred to your device. The higher, the better!

Internet Access: Internet is filtered based on categories and content types. For example BASIC will allow business and educational sites, but not streaming sites such as Youtube.

Security: Some devices may ask for you to select the wifi security. If prompted, use the types listed.

Your-District-Username: This is the first part, before '@', in your district email address.

Your-Password: The password associated with your district account.
